

**IN EVERY MOMENT OF DISCOVERY,  
HEALING AND CARE**

**YOU WERE THERE.**

At Sinai Health, donors are part of every clinic, surgical procedure and patient interaction. Your support fuels cutting-edge research and innovative programs that change lives.

We truly couldn't do it without you – thank you. Here is just some of the impact you've made this past year that will continue to transform lives for future generations.

**Completing 30 robotic-assisted IBD surgeries last year.**

Since its debut at Sinai Health in Fall of 2021, the donor-funded da Vinci Xi robot has transformed surgical care. **All three colorectal surgeons now use it to perform complex, minimally-invasive procedures for patients with IBD and other conditions.** Their goal is to double the number of robotic-assisted surgeries in the year ahead. The future of surgical care is here, and it's changing lives – thanks to you.

**Want to see the da Vinci in person?**

You could be one of 10 to get an exclusive, behind-the-scenes tour of our surgical innovation suite and see how donor generosity is truly transforming care in our community! Enter your name at [SinaiHealth.ca/DaVinciContest](https://SinaiHealth.ca/DaVinciContest) by March 31.

**Providing critical nutrition to fragile preemies.**

**1,500+** NICU babies assisted every year

Thanks to the generosity of donors – who gave over \$302,000, and a matching gift from the Rogers-Hixon Foundation, we exceeded our fundraising goal, and we are now able to purchase a new milk analyzer that optimizes the nutrition and quality of donor milk, and cuts processing times by 60%. The Rogers Hixon Ontario Human Milk Bank is the only accredited Milk Bank in Ontario and delivers pasteurized donor human milk to over 52 NICUs across Ontario and Atlantic Canada – **improving the health of our tiniest patients.**

“ We are so grateful to donors for believing in our mission, for supporting families during some of the hardest moments of their lives, and for helping babies get the best possible start. ”

– Dr. Michael Pitino,  
Director, Rogers Hixon Ontario Human Milk Bank

## Fueling critical women’s health research.

Following the creation of the Weston & O’Born Centre for Mature Women’s Health – the most comprehensive of its kind in the world – donors have continued to fuel essential, life-changing research. **Together we are closing major gaps in understanding how women experience heart disease, chronic pain, depression and more.** With half the population’s health care underfunded and underserved, it’s time for answers. Together, we’re prioritizing finding them.

## Improving access to equitable health care for all.

**\$125,000** raised to advance equitable health care

Our Equity, Diversity, Inclusivity and Social Accountability Initiative is improving access to high quality care for all members of society, as we further develop best practices in social accountability, Indigenous and cultural health. Thanks to an outpouring of support on Giving Tuesday, and the generosity of a matching gift by the Koffler Family Foundation, we surpassed our fundraising goal. **These funds are providing basic necessities for patients in need, enhancing mental health training for our staff and advancing culturally respectful health care.**

“ Thank you to all the donors for your generosity this year. Your gift is a wonderful reminder that our patients are surrounded by a caring community that is keen on supporting them when they are at their most vulnerable. ”

- Catalina  
Complex Care Coordinator and Social Worker  
Mount Sinai Hospital’s Comfort Closet

## Making high-quality care more accessible.

**7,000** more patients receiving care

Opened in March 2025, our new Ambulatory Care Centre is a **state-of-the-art facility that brings together lab testing, doctor visits and follow-ups in one location – improving continuity of care across many specialties.** Thanks to donor generosity, many patients have already benefited from high-quality care in this hub, built for comfort and efficiency.

**YOUR IMPACT IS REAL.**
